

## Camloc locks, hinges and handles

# Industrial door applications

Camloc offer an extensive range of heavy-duty standard door products including locks, hinges and handles suitable for use in even the most demanding industrial applications.

## Door locks

Camloc locks provide quick and easy latch engagement systems from low-load to heavy-duty lock applications in industrial equipment. The toughness and reliability of Camloc locks ensure the security of your applications. Suitable for use in virtually any industrial lock applications and with a wide range of customisation options available to ensure you get the perfect lock for your requirements.

### Benefits:

- Tough, reliable locks suitable for demanding industrial applications
- Multiple customisation options available including key forms
- A wide range of finishes and coatings available
- Ensure the security and safety of your applications

# Door hinges

Camloc high-quality, industrial hinge mechanisms offer exceptional strength and long life cycles for use on doors, panels, machine guards and similar equipment. Both internal and external mounted hinges are available with a variety of sealing options and in a variety of materials.

## Benefits:

- Superior design delivers outstanding strength and performance
- A wide variety of sizes, styles and customisation options available
- Tough and reliable hinges suited to industrial applications

# Door handles

Camloc's extensive range of high strength handles, including surface mounted and flush varieties, are suited to use on industrial door systems and similar equipment. These handles, available in lengths from 10cm to 1m, can be fitted with standard screws and can be installed and removed with a screwdriver.

## Benefits:

- Easy to install and simple to use
- Resistant to solvents, oils, greases and other chemical agents
- Hard-wearing and reliable
- Tough polyamide construction for industrial applications
- D20 & D30 available in a variety of lengths from 10cm to 1m
